revolutionary hearing enhancement technologies

Doctor Recommended DTMS-1 Tinnitus Therapy System

*Clinically proven two-to-one superiority
over conventional tinnitus therapy sounds*

Quarter shown for size reference

The Audio Bionics DTMS-1 (Dynamic Tinnitus Mitigation System) is based on innovative DTM sound formats shown to be twice as effective as conventional tinnitus therapy sounds in a first-of-its-kind clinical study sponsored by the U.S. Veterans Administration. The impressive results of the study were published in the Journal of the American Academy of Audiology.

The DTMS-1 is a comprehensive tinnitus therapy system including a proprietary individually-calibrated MP-4 player providing 12 tracks of improved DTM sound formats, plus three separate playback devices – occluding earbuds that reduce external sounds, non-occluding earbuds that allow external sounds to be heard with the tinnitus therapy sounds, and two ultra-high performance table top speakers. The DTMS-1 is highly affordable compared to other professional tinnitus treatment systems and yet provides therapy sounds with clinically proven two-to-one superiority.

History of DTMS Technology:

- > *DTMS-1 tinnitus therapy sounds shown twice as effective as all others tested in clinical study sponsored by Veterans Administration*
- > *Results of the Veterans Administration study published in the JAAA*
- > *FDA 510(k) clearance received on DTM tinnitus therapy sounds*
- > *Patents pending on improved DTM tinnitus therapy sound formats*
- > *Endorsed by leading tinnitus expert, Dr. Jack Vernon, as “the finest”*
- > *80+% success by Michael Robb, MD with hundreds of patents*
- > *Test marketed DTM sound to 1,000+ customers with 80-90% success*
- > *Audio Bionics DTMS-1 system features improved DTM sounds*

Proprietary System Components:

- > *A proprietary individually-calibrated MP-4 player with 12 tracks of improved DTM sounds plus a narrated track with various tinnitus coping techniques*
- > *Occluding earbuds that reduce outside sounds for isolated tinnitus therapy listening*
- > *Non-occluding earbuds enabling outside sounds to be heard with tinnitus therapy sounds*
- > *Two precision desktop speakers with extended high frequency response*
- > *Coupler enabling iPod or TV sound to be blended with DTMS-1 sound*
- > *Ear protection earplugs for noisy environments when not using system*
- > *Step-by-step DTMS-1 user-instruction DVD and user-instruction booklet*
- > *Certificate toward hearing care professional consultation on system*
